

SCHOOL IMPROVEMENT PLANS

In accordance with the District's plan for school-based management and shared decision-making, the Board of Education, through the Superintendent of Schools, shall initiate measures designed to improve results related to State performance standards. If the District performs below the school accountability performance criteria, the Superintendent shall develop a Local Assistance Plan (LAP) that shall specify the steps that will be taken to raise student results above the required criteria. In lieu of a separate Local Assistance Plan, such plan may be incorporated into the District's Comprehensive Education Plan (CEP).

The Local Assistance Plan shall identify:

- The process by which the Local Assistance Plan was developed in accordance with the District's plan for school-based management and shared decision-making;
- The resources that will be provided to implement the Plan;
- The professional development activities that will be taken to support implementation of the Plan; and
- The timeline for implementation of the Plan.

The Local Assistance Plan shall be developed in consultation with teachers, administrators, other school service professionals, students and parents, as well as with staff of the State Education Department or others assigned to assist in the planning process.

The Local Assistance Plan shall be formally approved by the Board no later than January 15 of the school year in which such plan is required.
