

BOARD ADOPTED REGULATION: ADMINISTRATIVE REGULATIONS

The Board of Education may adopt regulations to govern the school district.

Administrative regulations are the rules and procedures adopted by the Superintendent of Schools and other administrators for the implementation of Board policies. Administrative regulations also allow for the administration of regulations and laws of the State of New York and the United States.

The Superintendent of Schools is responsible for the development, adoption, and distribution of administrative regulations, as well as their ultimate interpretation.

As a general principle, administrative rules and regulations need not be approved by the Board in advance of issuance.

The Board reserves the right to review and demand revisions of administrative regulations should they, in the Board's judgment, be inconsistent with the policies adopted by the Board.

Copies of all administrative regulations shall be placed in the Board Policy Book in each school building office, and shall be open for public inspection.
