A Letter from Superintendent Jonathan W. Buhner

October 18, 2016

Dear Lisha Kill Middle School Parents and Staff Members,

The purpose of this letter is to inform you that on Tuesday, October 18, 2016 the District received preliminary results of water quality testing which is being performed in all of our schools in accordance with legislation signed by Governor Cuomo on September 6, 2016. The new law requires all New York State public schools to test all water sources for lead contamination. The State Department of Health and the State Education Department have established an action level threshold of 15 parts per billion or .015 mg/L. The water sources that test above this level must be immediately taken out of service and corrective action must be taken.

It is important to note that South Colonie Central School District has followed its own water testing protocols initiated approximately 15 years ago, long before the state initiated this recent legislation. Since then, South Colonie's Operations and Maintenance staff members have conducted random samplings of drinking water sources at all sites across the District. Over the years the results have shown that levels have consistently tested below the actionable level set by the state.

The majority of water testing results for Lisha Kill Middle School have been received by District officials. All potable water sources at Lisha Kill Middle School were tested over the last few weeks including drinking fountains, sink faucets in classrooms, restrooms, and faucets in the kitchen/cafeteria areas. Of the 56 samples which were received back from testing, three (3) were above the allowable .015 mg/L or 15 parts per billion as per the new regulations. These three (3) sink faucets, identified below, are used for hand washing and cleaning purposes; none are designated as drinking fountains.

Sink in Boys Locker Room	.078 mg/L
Sink in Upstairs Boys Large Bathroom	.018 mg/L
Sink in Girls Coaches Office	.120 mg/L

The District has immediately shut off water to the affected sources listed above and will be taking remedial steps pending another water quality test. As a follow-up, additional water tests will be conducted to ensure the remediation was successful before placing the sinks back in service for students and staff members.

Please be assured that we will continue to take the necessary steps to ensure the quality of drinking water throughout our District meets these new state regulations. We will keep you informed as we continue to receive the results of the ongoing water testing at all of our schools.

Please call me at (518) 869-3576, should you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Jonathan W. Buhner". The signature is fluid and cursive, with a long horizontal stroke at the end.

Jonathan W. Buhner
Superintendent of Schools
